#### **Education & Skills**

Johns Hopkins University, B.S. Computer Science

Aug 2018 - May 2021 (Will graduate early for this opportunity)

GPA 3.81/4.0, Dean's List

Coursework: Data Structures, Intermediate Programming in C & C++, Discrete Math, Calculus III, Differential Equations Organizations: JHU ICPC Competitive Programming Team, HopHacks Cohead of Design, ACM Freshman Board

Web Dev: Very Experienced: React, Redux, Saga, JS/TS, GatsbyJS, Jest, HTML, CSS/SCSS Familiar: Open Source, MaterialUI More Languages & Frameworks: Experienced Java, JUnit, Python, C#, Unity Familiar: C, C++, Django, WebSockets, Bash Productivity & Tools: Atlassian Crucible, Fisheye, JIRA, Confluence, Agile, Scrum, Travis Cl, Netlify, Linux, Command Line, Git Design: Photoshop, Illustrator, After FX. Designed the Official JHU 2022 Class Banner & Class T-shirt given to 1,300+ Freshman.

# Experience

Johns Hopkins Applied Physics Laboratory Air Missile Defense, Laurel MD

May 2019 — Aug 2019

- Software Engineer Intern <React, Redux, Redux-Saga, TypeScript, Jest, HTML, CSS, WebSockets, MaterialUI, Cesium/> Developed full stack features for a Department of Defense Air Missile Defense mission planner for Navy Warfighters
- Merged ~7,700 lines of robust code out of the ~25,000 lines coded by 4-5 active fulltime developers since I began
- Developed an extensible Modal system and wired 25+ asynchronous features querying a synchronization microservice
- Wrote extensive end-to-end tests and integration tests for every feature to verify Redux store states after async calls

Semester.ly, Baltimore MD

Jan 2019 - May 2019

Full Stack Software Engineer Intern <React, Redux, JS, Jest, Python, Django, HTML, SCSS, PostgreSQL, Linux, Open Source/>

- Introduced new features to the open-source course scheduling repo and helping deliver schedules to over 2,000 users
- Coded a data import flow using Django MVC framework, interfacing with JHU IT servers to verify thousands of schedules
- Helped other interns with frontend design using React and SCSS, pushing several visual enhancements to the repo

Princeton University, Troyanskaya Laboratory, Princeton NJ

Jun 2017 — Aug 2017

Research Intern < Python, Multiprocessing for Computational Genomics, Bash, Linux/>

- Lead the intern team on research and development of a gene fold overrepresentation data analysis repository
- Designed a multiprocessing overhead mapping system, speeding up tests like single-thread PAGE by 5x using just 8 cores
- Wrote seven statistical algorithms and unit tests in 1,500 lines of robust, modular and well-documented code
- Presented findings to the Deputy Director of Genomics at the Simons Foundation in New York City

### Activities

HopHocks Hackathon Organizer Team

Dec 2018 - Present

Cohead of Design and Frontend <React, MeteorJS, Linux, LESS, Adobe Photoshop & After Effects /> www.hophacks.com

- Co-designed the Spring 2019 and Fall 2019 website Frontends with over 11,500+ combined views
- Appointed Cohead of Design by the Director after my first year with HopHacks

### Jane Street 2019 SEE Program, 1 of 32 invitees

May 2019

- Attended an all-expenses paid 3-day trip to Jane Street Headquarters in NYC learning about working on the trading floor
- Selected for my Blotto game entry, using simulations and psychology to rank ~40th/300 entries from fulltime employees

#### **Awards**

2016 National STEM Video Game Design Challenge Team Award (\$3,000 prize), 1 of 18 winners from 3,000+ entries Oct 2016

Platinum Division Qualifier, Top 10% contest ranking @ USA Computing Olympiad Nov 2018 Competitions 4<sup>th</sup> Place/31 contestants (2<sup>nd</sup> Place undergraduate) @ Bloomberg CodeCon at JHU Nov 2018 5<sup>th</sup> Place/15 teams @ ACM ICPC Mid-Atlantic Regionals at JHU Jan 2017

Hackathons 2<sup>nd</sup> Place/35+ teams, Best Use of Google Cloud (\$768) Sept 2018 @ HopHacks, Johns Hopkins University Assistive Tech Track, Best Use of AWS/10+ teams (\$500) @ HackNYU, New York University Feb 2017

Best Mobile App/10+ teams @ HackMHS II, Millburn High School May 2015

## **Projects**

Machine Learning- Charm City Murals, winner of the HopHacks 2<sup>nd</sup> Place award github.com/jshi22/Charm-City-Murals Training vision models on just one image using Python, TensorFlow and Augmentor for recognizing Baltimore murals Winter 2019

Video Game-Radiant, winner of the National STEM Video Game Design award github.com/jshi22/Radiant Developed at a Carnegie Mellon University game academy, 6,000 lines of C# code in the Unity Game Engine

Android App-Pirate Maps play.google.com/store/apps/details?id=com.CSI.HSSPirateMaps

Summer 2016
